

VERIFICA FIRME TOR BROWSER CON KLEOPATRA PER WINDOWS

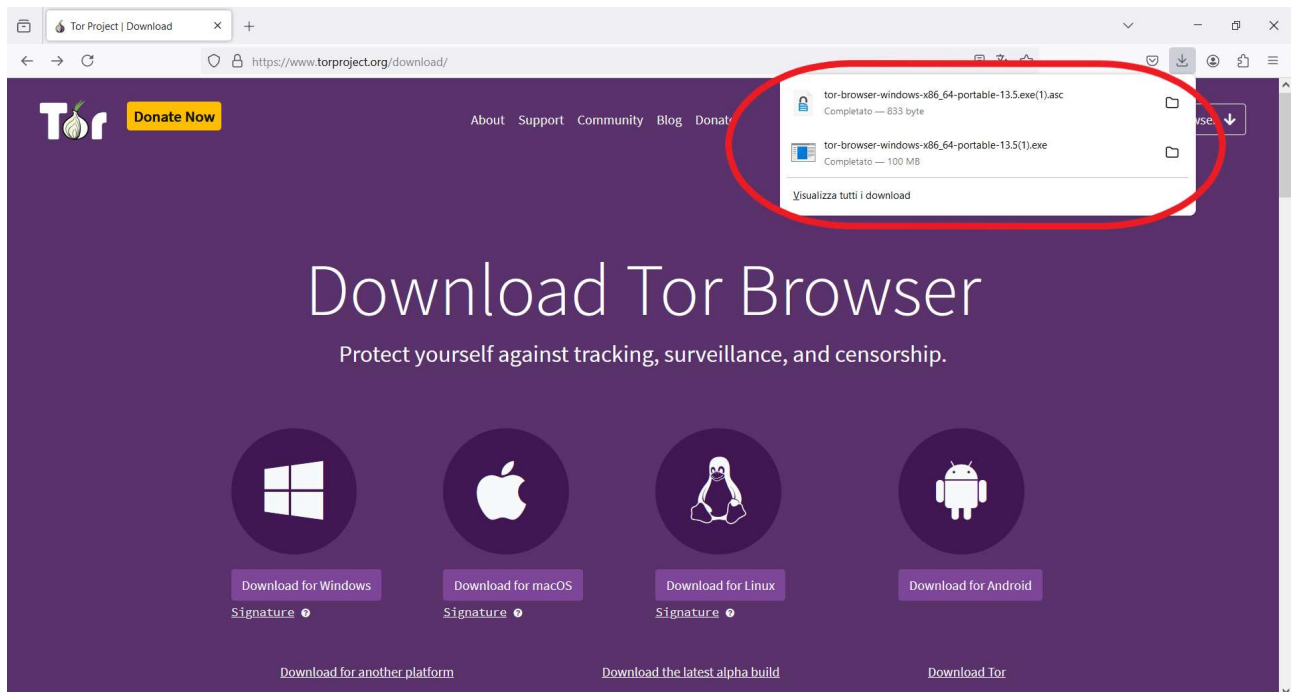

Digitare sul Browser "Tor Browser" e andare sul sito di Tor Browser Project per il download.

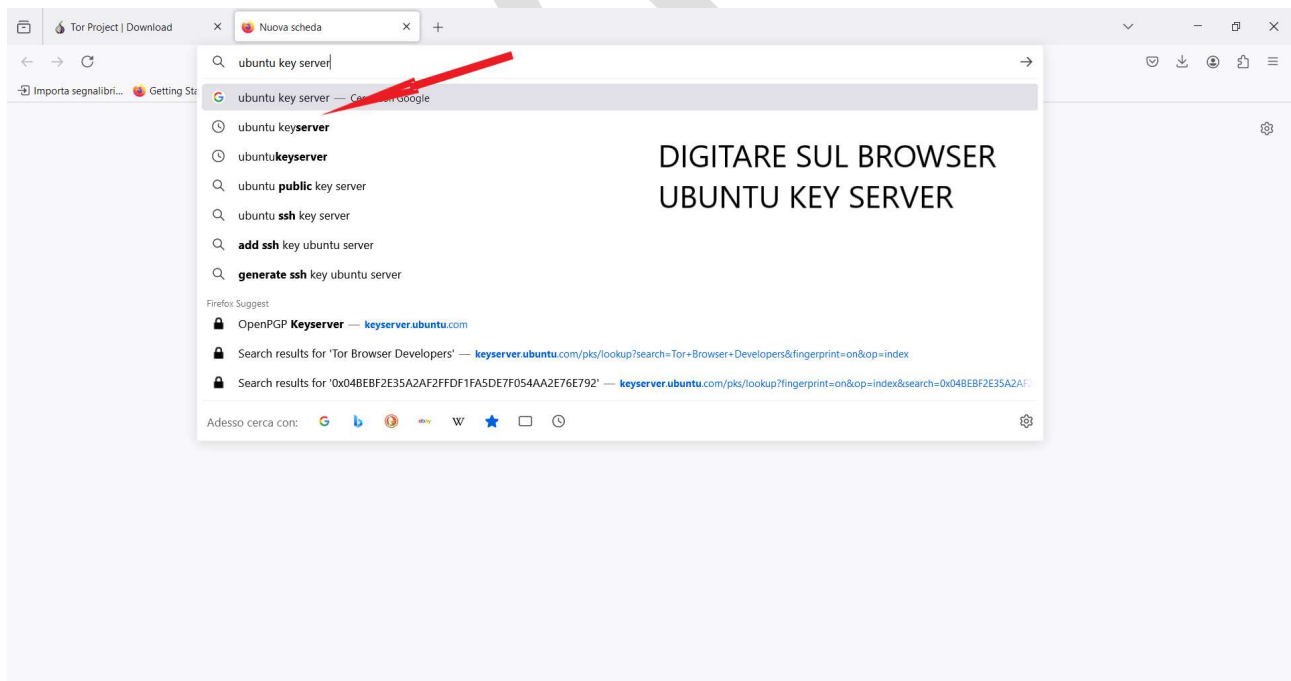

Scaricare sia il file di download adatto al proprio sistema operativo che il file delle firme.

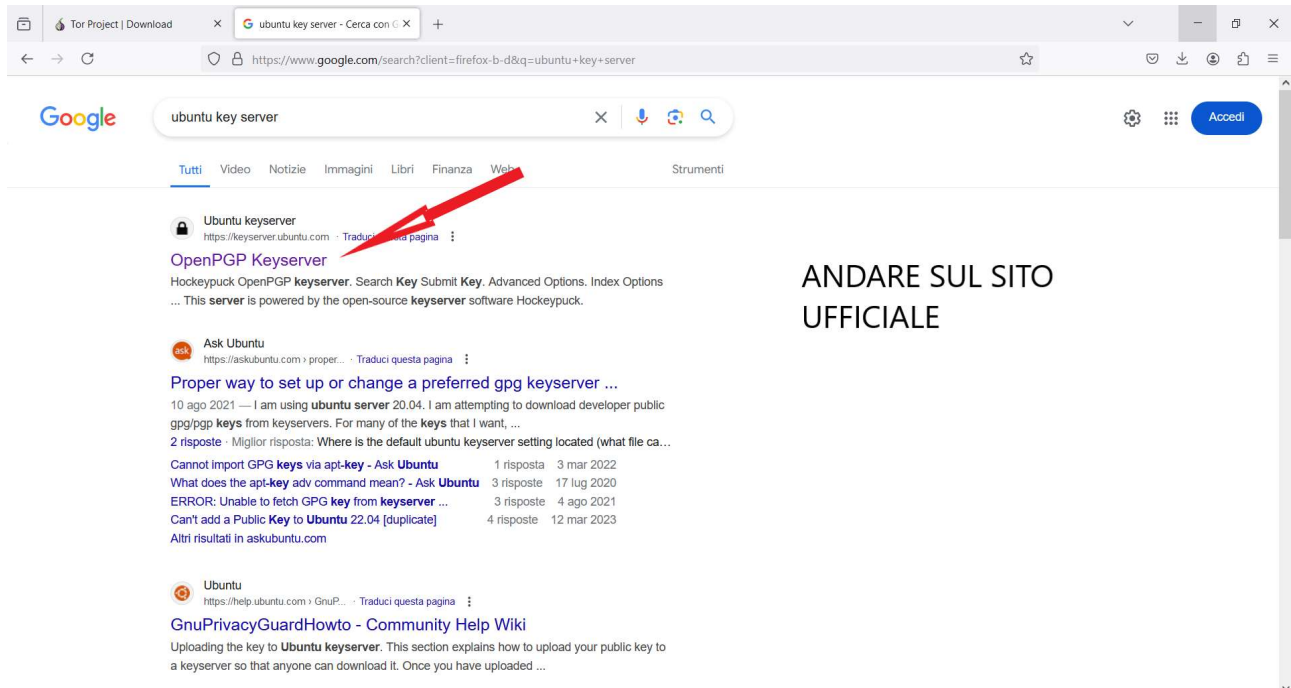

Scaricare le firme nella medesima cartella.

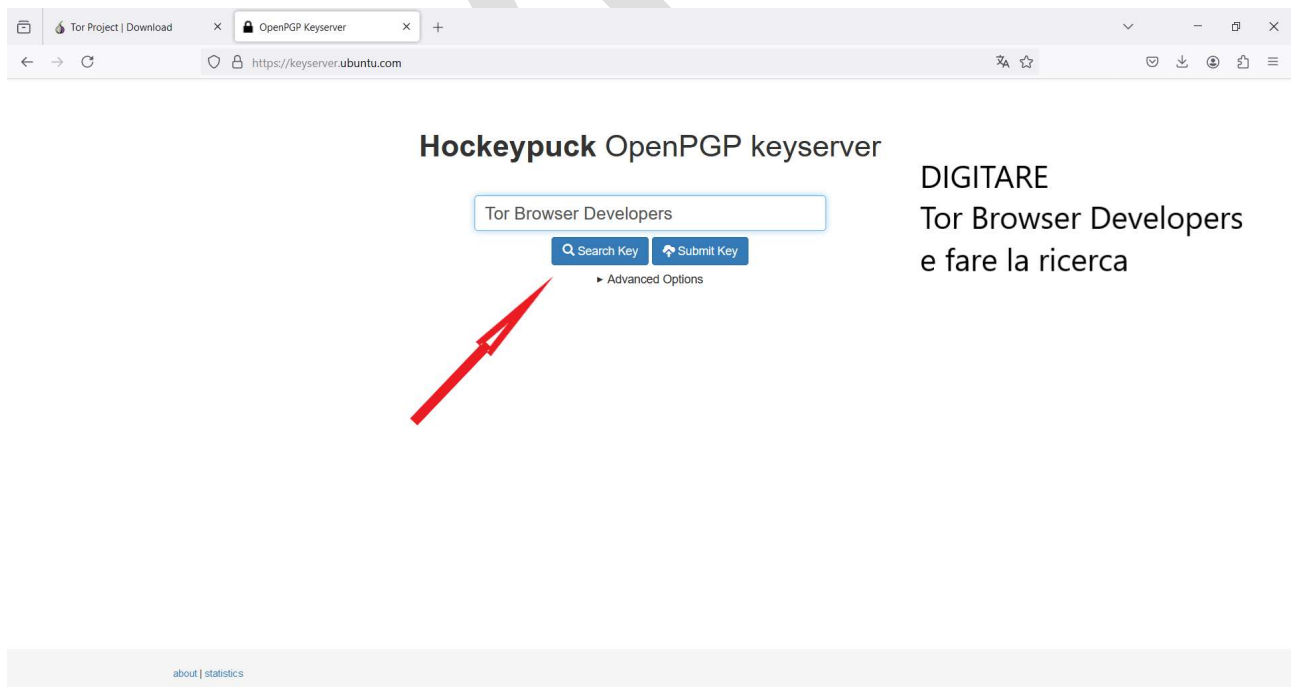

Cercare la firma originale pubblicata dal gruppo degli sviluppatori di Tor Browser su uno dei siti che raccolgono le suddette firme: ubuntukeyserver. Digitare quindi il nome del sito sul browser.

Andare sul sito ufficiale

Inserire il nome dello sviluppatore o del team di sviluppatori, come in questo caso.

Cliccare sulla stringa azzurra cliccabile per scaricare la firma che verrà a sua volta salvata nei Downloads.

Aprire la firma con il Blocco Note oppure direttamente con Kleopatra

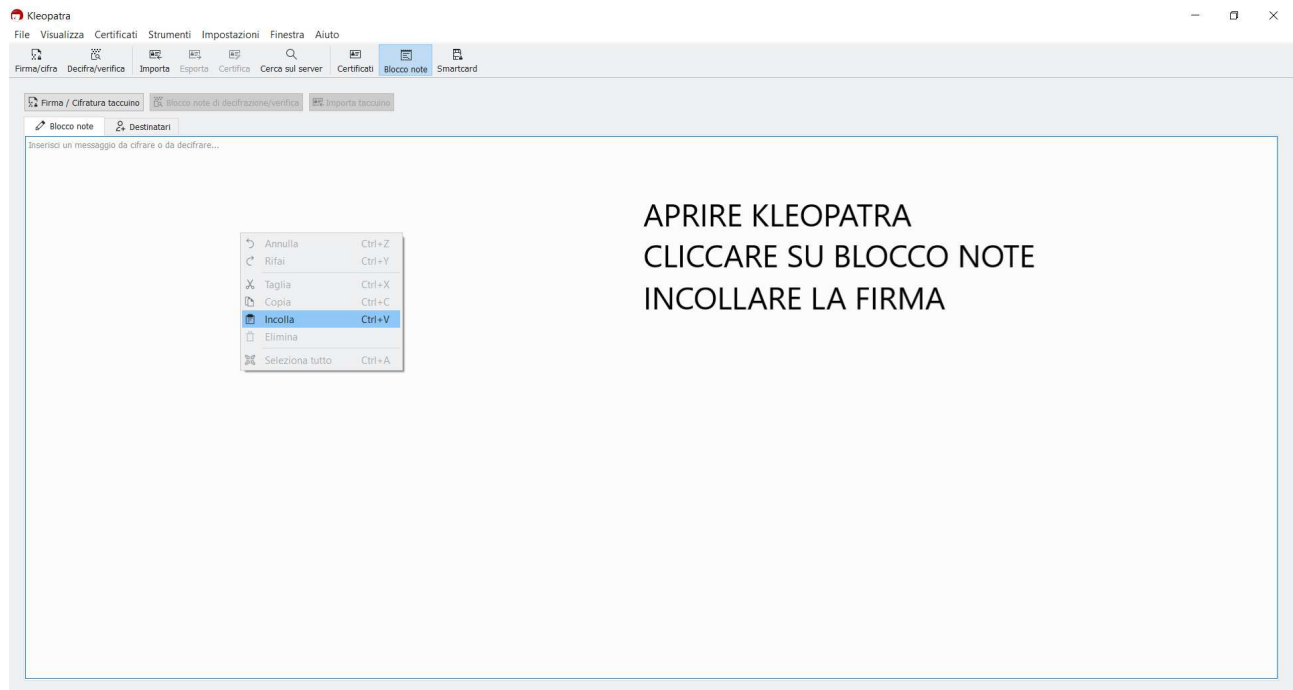

APRIRE CON BLOCCO NOTE

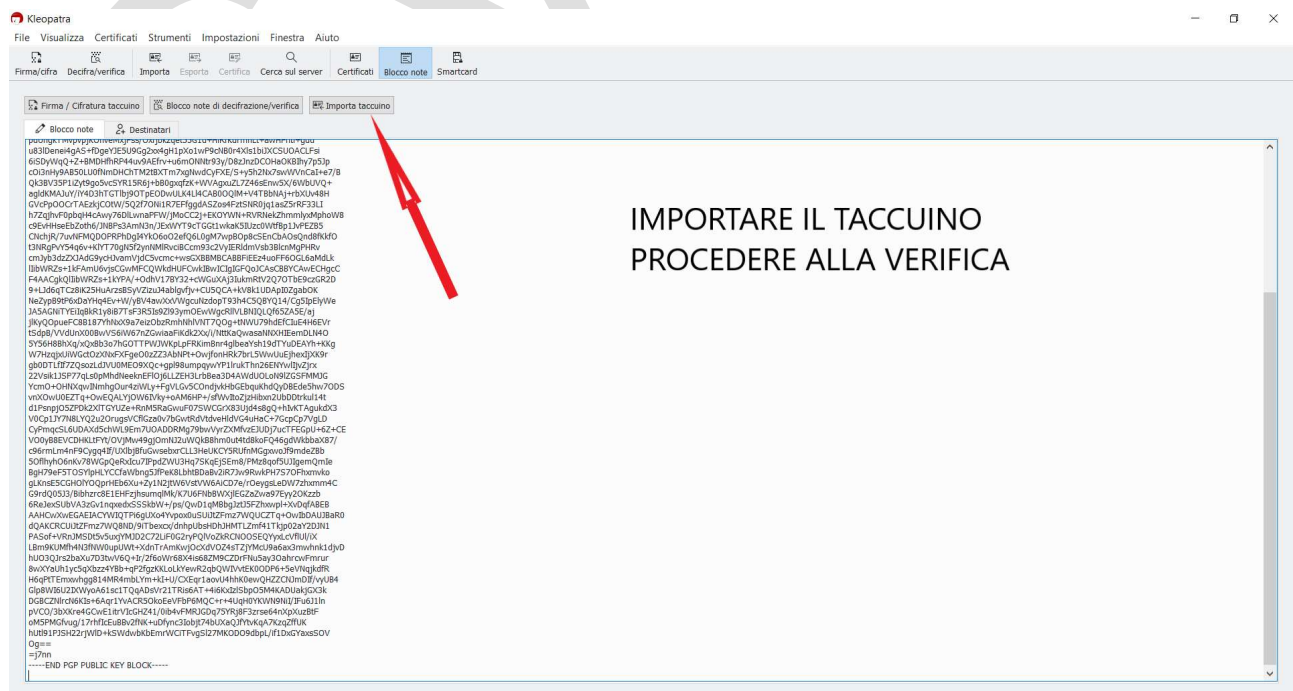

Con il tasto destro selezionare tutto il testo.
Aprire Kleopatra per copiarla su Blocco Note ed importarla.

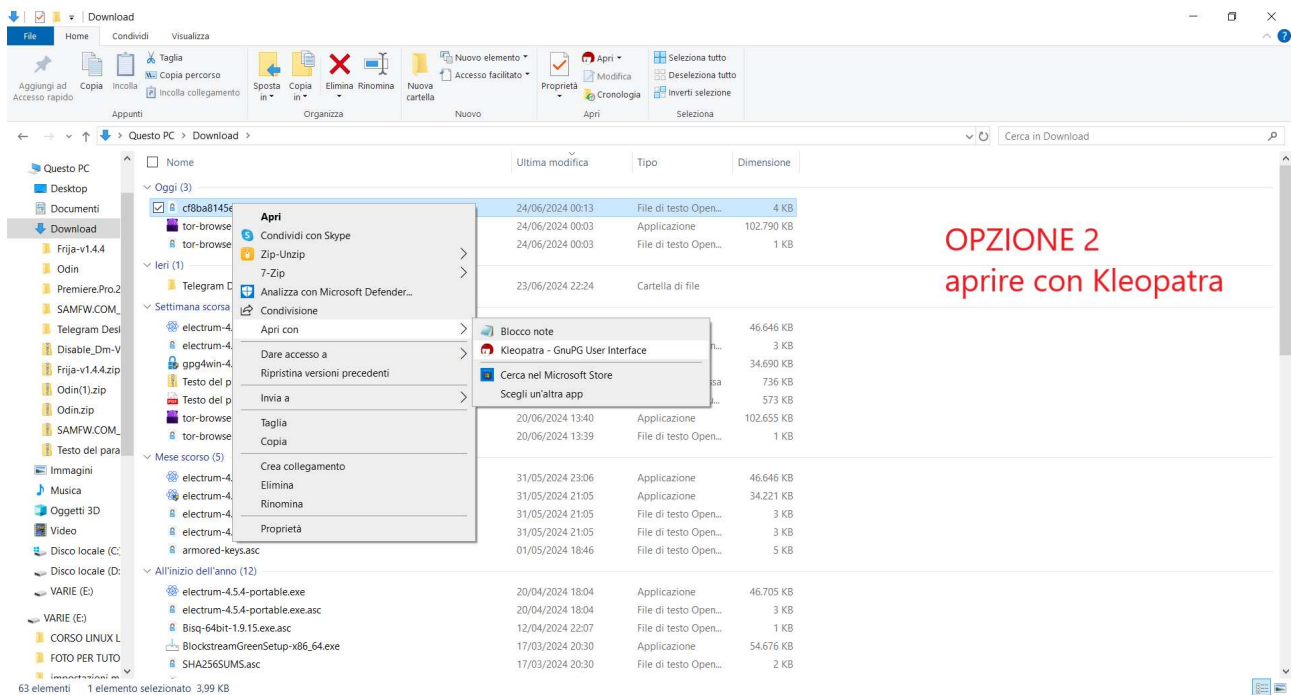

Incollare il testo.

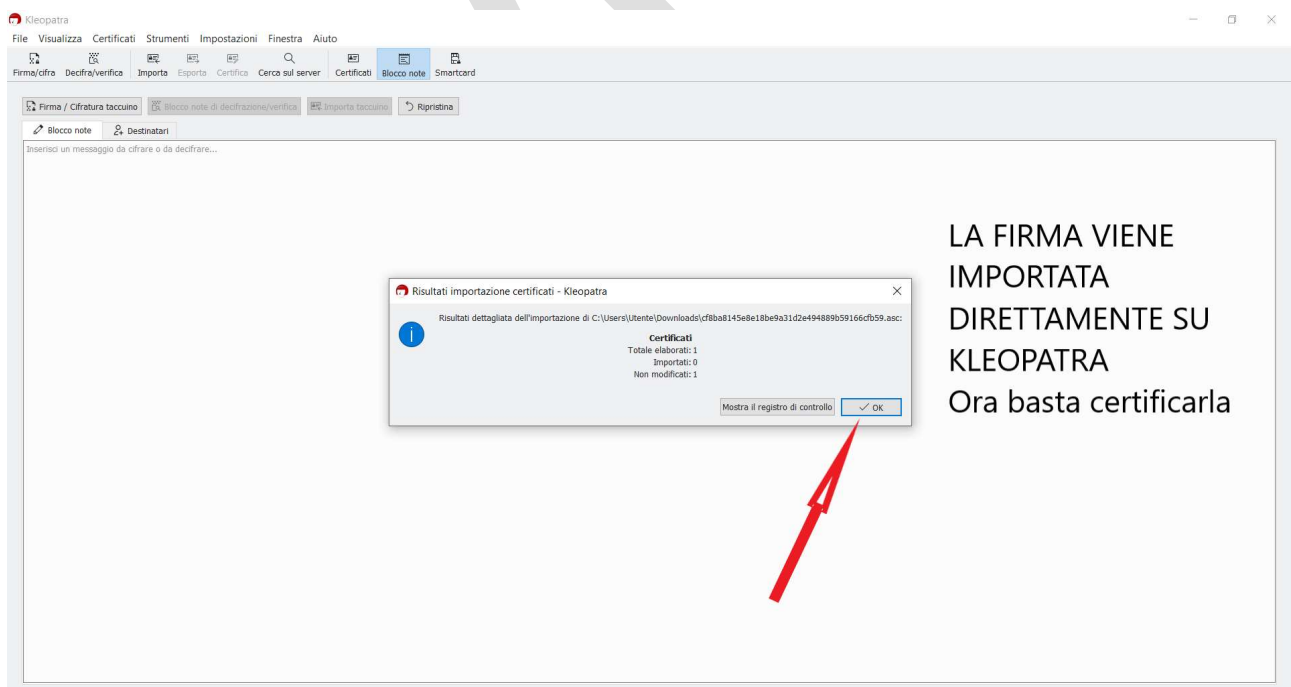

Importare il taccuino e certificare la firma.

OPZIONE 2
APRIRE CON KLEOPATRA

Certificare la firma.

Se la certificazione va a buon fine si può lanciare il programma.
Una volta lanciato, creerà un collegamento sul desktop utilizzabile per aprirlo.
